Learning Opportunity

Adolescent Brain Development

Presenters

Dr. Robbin Gibb

Robbin Gibb has a Bachelor's degree in Chemistry, and a Master's and PhD in Neuroscience, all from the University of Lethbridge where she is currently a Professor in the Department of Neuroscience

Her research is focused on

1. How prenatal and preconception experience influence brain development and
2. How to improve outcomes for kindergarten children by enhancing early literacy, executive function and self-regulation, and motor skills in preschool children.

She has over 100 publications including journal articles, book chapters, and books. Robbin was the proud recipient of the ATA Educational Research Award for 2023 and the Distinguished Teaching Award from the Confederation of Alberta Faculty Associations for 2024. She is a mother of 2 and a grandmother of 8.

Registration Notes

This is a hybrid learning opportunity. Please ensure that you check off if you will be attending online or in-person.

We recommend joining us live to get the most out of your learning, however, a recording will be available for 30 days following the session.
