Program

Supporting English Language Learners in the Writing Workshop

Participants in this session will explore the foundation and the load bearing walls that sustain an engaging writing workshop. Then, they will learn how to rough in the details, in response to what they discover about the students they serve--particularly ENL students. Join us as we discover more about identifying the strengths and needs of this population and specific strategies that help them develop new language skills as they master the process and craft of writing bit by bit. Come prepared to make and write and return to your classrooms excited to help your students do the same.

This session is possible through funding from Alberta Education
