About the Session:

Essential Training

This training provides all Tacpac users with the understanding and skills necessary for the effective delivery of Tacpac.

It is an essential training for both for experienced practitioners and for complete novices.

We look at the whys and hows of Tacpac

, combining theory and practice into fun, interactive and stimulating days.

This training enables you to:

- Understand the theory behind Tacpac
- Internalise and deliver the Tacpac activities effectively
- Experience sensory overload for yourself
- Heighten awareness of your own senses (we have more than 5)
- Discover how to work effectively with touch
- Meet other professionals, parents and carers
- Understand our sensory system and the role of touch
- Understand the essential role of the music in Tacpac

You can find out more information about TacPac here: <https://tacpac.co.uk/>

About the Presenter(s):

Susie has spent her teaching career working with children with SEN. Prior to this, she worked with both adults and children in residential care. Susie has specialised in supporting children with language and communication needs, including those with ASD (Autistic Spectrum Disorder). She received a post-graduate diploma in Language and Communication Impairment in Children (LACIC) from Sheffield University. She is especially passionate about using Tacpac to enhance interaction and attachment between children and their carers. Susie leads Tacpac trainings and alongside Hilary, continues to develop it to support the professionals who are using Tacpac with an increasing range of people. These include babies in hospice care, adults with profound disabilities and those with Alzheimer's.
