Program

** POSTPONED to September 19th & October 17th, 2019**

To thrive in today's world and to shape tomorrow's, students need to tap into their creative potential and learn to express themselves in new and innovative ways. Creative skills help students become better problem solvers, communicators, and collaborators. They explore more and experiment more. They tell richer stories and find their own unique voices. And they carry all these skills through everything they'll do in school and beyond.

Join us to learn about Everyone Can Create, a new program from Apple designed to help unleash the creative potential in every student. Everyone Can Create includes a collection of free project guides that teach students how to develop and communicate ideas through video, photography, music, and drawing. And it gives teachers fun and meaningful ways to bring these skills into any lesson, topic, or assignment.

At this event, you'll:

- Discover firsthand the creative potential of iPad, now with Apple Pencil support.
- Experience engaging lessons that introduce fundamental skills and techniques in photography, video, music, and drawing using free apps available on iPad.

- Get hands-on with the Everyone Can Create teacher guide that includes materials to help teachers infuse creative skills into the subjects they
  teach every day.

You'll leave the event inspired to bring creative expression to every subject and every student.

iPads will be provided for participant use during the sessions. As participants learn and take themselves through the process that they will be using with their students to produce products between sessions. In your schools and classrooms the techniques you learn can be applied regardless of the technology platforms available to you.
