Program

The Adaptive Schools Foundation Seminar presents a productive, practical set of ideas and tools for developing collaborative groups in becoming effective and better equipped to resolve complex issues around student learning. The goal of this important work is to develop the resources and capacities of the organization and of individuals to coherently respond to the changing needs of students and society.

The Training takes place in two 2-day sessions with time between sessions to allow for participants to return to their schools, apply what they have learned and utilize that learning in the subsequent training days in June. It is recommended that schools/jurisdictions facilitate **3-4 participants from each attending school** to better operationalize the team group processes.

Included in the fee is the cost of the participant workbook.

During the four-day Adaptive Schools Foundation Seminar participants will develop:

- An increased capacity to initiate, develop and sustain high functioning groups.
- Understandings of system thinking as a rationale and focus for Adaptive Schools work.

- Understandings of the importance of group identity for sustaining adaptivity.
 - New lenses for diagnosing the stages and phases of group development.
 - Expanded repertoires of practical facilitation tools.
 - Understandings of when and how to engage groups in dialogue and discussion, the limitations, forms and values of each.
 - Skills to move groups beyond consensus to common focus.
 - Ways to value and use dissension, argument and conflict.
 - Strategies for keeping group members on tack, on topic, energized and resourceful.
-
